

PROJECT UPDATE

As part of the Zoo Interchange project, I-894/US 45 North traffic will be switched onto a temporary roadway, east of the current roadway. Beginning Monday, March 9, motorists will encounter a new traffic pattern as they travel on I-894/US 45 North. Just north of Greenfield Avenue, the three lanes of I-894/US 45 North will shift east onto the temporary roadway. The right lane will serve as an “exit only” to I-94 East (Milwaukee) and the two left lanes will continue north and connect with the existing two lanes of US 45 North through the interchange.

As part of this traffic switch, the ramp from I-894/US 45 North to I-94 West will close for reconstruction until late 2015. The existing I-894/US 45 North lanes from Greenfield Avenue to the interchange will also be reconstructed during this period.

As always, please stay alert, watch signs and follow pavement markings.
